2011 Suzuki RMZ-250

Spark Arrested

2183714 STAINLESS STEEL SLIP-ON RS4 WITH ALUMINUM SLEEVE

NOTE: IN THE STATE OF CALIFORNIA, IT IS ILLEGAL TO MODIFY THE EMISSION CONTROL SYSTEM INCLUDING THE CARBURETORS OR FUEL INJECTION OF ANY HIGHWAY VEHICLE.

CAUTION: The muffler packing on this system MUST be replaced every 6-8 hours of use, or after each moto. Failure to follow recommended muffler re-packing interval can cause muffler damage and may void the warranty.

THIS PRODUCT IS DESIGNED FOR USE IN CLOSED COURSE RACING AND IS NOT INTENDED FOR ANY OTHER USE.
Installation Procedures:

Caution: Exhaust system may be extremely hot. Let motorcycle cool down before beginning installation.

Note: Read through all instructions before beginning installation.

Tools Needed:
Metric Socket Set
Ratchet Wrench and Extension
Torque Wrench
Spring Puller Tool

Installation Steps:

1 Stock Exhaust Removal
   a. Remove right rear number plate (see Fig. 1 for fastener locations).
   b. Loosen stock muffler clamp.
   c. Unbolt chassis and muffler mount bolts.
   d. Remove stock muffler (see Fig. 2 for fastener locations).

2 Install Yoshimura Exhaust
   a. Slide supplied tailpipe clamp over stock header pipe.
   b. Temporarily remove tailpipe-to-muffler spring.
   c. Install supplied rubber grommet into aluminum muffler mounting bracket.
      Install aluminum insert into rubber grommet (make sure shoulder of aluminum insert faces toward the frame, see Fig. 3).
   d. Install Yoshimura tailpipe and muffler onto stock header.
      Note: Stock tailpipe gasket will not be reused.
   e. Mount stock chassis mount bolt to tailpipe. Leave loose
   f. Mount muffler with stock muffler mount bolt and washer. Leave loose.
   g. Install supplied tailpipe-to-muffler spring.
   h. Check exhaust for proper position and clearance and adjust if necessary.
   i. Tighten chassis mount and muffler mount bolts to 15 ft-lb (21 N-m).
   j. Tighten tailpipe clamp to 15 ft-lb (21 N-m).

3 Reinstall
   a. Reinstall number plate.
   b. It is recommended that the muffler and tailpipe be wiped down with rubbing alcohol to remove oil and fingerprints. This will help prevent tarnishing of the finish after the exhaust is heated up.

   Before starting motorcycle, check for proper clearance between new exhaust system and rear suspension (i.e. tire, swingarm, brake, rear shock, etc). If any problem is found, please carefully follow through the installation steps again. If problem still persists, please call Yoshimura tech department at (800) 634-9166 / in CA (909) 628-4722.

   NOTE: After starting motorcycle, it is normal for new exhaust system and muffler to emit smoke until oil residue burns off.

1. Using a 4mm Allen key, remove the bolt that secures the aluminum ring and spark arrester to the muffler (see Parts Diagram for location).

2. Remove the spark arrester from the muffler.

3. Using a wire brush, remove carbon deposits from spark arrester screen. Inspect the screen for excessive wear or damage. If spark arrester is excessively worn or damaged, the spark arrester must be replaced. Cleaning and inspection should be performed after every 60 hours of use.

   **CAUTION:** Gloves and safety glasses should be worn while cleaning spark arrester.

4. Re-install spark arrester and aluminum ring. Torque the spark arrester securing bolt to 1.0 kg-m (7.3 lb-ft).

   **NOTE:** It is recommended that a low strength “Loc-tite” is used on the spark arrester securing bolt.
